

Manoeuvre joysticks

Manoeuvre joysticks

The EME system makes it possible, at low cost, to add several manoeuvre functions to a single joystick. Today, the EME system is used in many areas, such as forestry and construction equipment, trucks, and construction cranes. The EME joystick has been developed in co-operation with medical experts, ergonomists, technicians, and drivers.

The basic joystick can be fitted with proportional steering, with flick switches or buttons, and a side panel with 5-10 functions.

E2000	Basic joystick (Note: left or right-handle model)
E2002	3 on / off push-button functions
E2004	6 on / off push-button functions
E2006	9 on / off push-button functions
E2008	12 on / off push-button functions
E2020	Side control panel, angled with 5 switches, left-hand
E2021	Side control panel, angled with 5 switches, right-hand
E2026-1	Adjustable wrist support

Switches for side control panel / manoeuvre joystick

L700002	Switch, touch
L700003	Switch, hold function 1-0-1
L700004	Switch, hold function 1-0-1 (12 poles)
L700005	Switch, self-returning/hold (1)-0-1
L700006	Switch, hold function 1-1
L700007	Switch, self-returning (1)-0-(1)

L660058	Switch, self-returning (1)-0-(1)
L660059	Switch, hold function 1-0-1
L660061	Switch, hold / self-returning 1-0-(1)
